

Are you looking to work for a European multinational, leader in its market, and that has achieved sustainable growth for many years...but cultivates, by its traditions and size, a very people-oriented culture? If so, come and dive into our world of crystal-clear water, tinted by the Bayrol turquoise...

BAYROL France, a subsidiary of KIK Consumer Products, Toronto Canada, is one of the leading companies in the field of pool and spa water care in Europe, offering extensive ranges of care products and automatic water treatment systems. The distribution of our products is done through the specialized trade channel and the internet, as well as through the large-scale retail distributors.

Our values are guided by a strong customer orientation, the need to respect consumers' safety as well as all pertinent regulations and the desire to empower and to be transparent with our employees. By joining us, you give yourself the means to achieve your ambitions and to be a creator of value.

BAYROL Group is looking for a :

Regulatory & MSDS Specialist (M/F)

Under the responsibility of our Head of Regulation Dpt, you will be responsible for monitoring the regulations governing our products and will be the privileged contact for our customers, swimming pool professionals and supermarkets, in this field.

The position is based indifferently in Germany-Planegg, near **Munich**, or in France- Dardilly, near **Lyon**.

Your responsibilities:

- Creation & regular update of Safety Data Sheets on our software Infodyne for our finished product according to CLP/GHS EU legislation;
- Ensure regulatory monitoring & updating of the CLP regulation and specific regulations impacting swimming pool water treatment products and raw materials classification EU-wide;
- Tracking of changes, compliance, and implementation of chemical legislation within the company
- Regulatory support in case of product recipe changes
- Support of the marketing department in the creation of GHS labels
- Monitoring of national chemical legislation, answering customer enquiries.

Essential skills to succeed in this role:

With a higher education of 2 years minimum in Chemistry/Biology or similar, you have acquired a previous experience in the field of regulations (REACH, CLP, GHS, ADR, IMDG). Experience in manufacturing industry would be appreciated.

Your English is at least professional.

Social competences, team spirit, autonomy, method, rigour and organisation are essential to succeed in this mission. SAP Knowledge is a plus.

You like proactive exchanges with both internal and external contacts. You are autonomous, conscientious, and structured working style. Working as a team is something natural for you.

Your current work environment:

A varied job and challenging projects in a multicultural environment

A work environment facilitated by flexible working hours and a home office policy

"Difference is an opportunity: Bayrol is committed to equal opportunities for disabled workers"

Are you interested? We are looking forward to receiving your application and salary expectations, motivated in the way you wish, at the following address ccheron@bayrol.eu
